

Installation Information

This package was created using Kernel V. 8.0 and VA FileMan V. 21.0 and requires the following external software:

<u>Package Name</u>	<u>Minimum Required Version</u>
VA FileMan	21.0
Kernel	8.0
MailMan	7.1
PIMS	5.3
Health Level Seven	1.6
Adverse Reaction Tracking	3.0
OE/RR	2.5
PCE	1.0

Pre-installation

1. Coordinate the installation with your ADPAC. There are many enhancements to this version, some requiring up front preparation by the ADPAC before this version is installed. For example, if the nuclear medicine data collection features are going to be used, the ADPAC will have to work with the Pharmacy ADPAC to make sure all radiopharmaceuticals used at the site have been added to the Drug file #50. (See the Radiology/Nuclear Medicine ADPAC Guide, Implementation Check List.)
2. The package will be installed using Kernel Installation and Distribution system (KIDS).
3. Make certain at least patches RA*4.5*2, RA*4.5*10, and DI*21.0*41 are installed **prior** to installing this version of the software. (If this is a virgin installation, you may skip patches RA*4.5*2 and RA*4.5*10.)
4. **If this is a virgin installation, you may skip this step.** Make certain the following entries are among those in the Imaging Type file #79.2:

Cardiology Studies (Nuc Med)
Nuclear Medicine

If they do not exist, try to determine how and why these entries were corrupted and make the necessary corrections. **The environment check routine**

requires the conditions in both steps 3 and 4 in order to run the installation.

5. Schedule downtime with the package and any interface users (e.g., any PACS/ Imaging or voice recognition system users). This installation will put RA namespaced options and protocols out of service for the duration of the installation. Please refer to the Test Site Install Times chart, page 23, for a sampling of installation and cleanup times. The cleanup runs in the background so users can go back on the system while it is running. The cleanup run time depends largely on how many entries are in File #74.4.
6. Six bulletins are exported with this package. These bulletins are generated when an important action happens, such as the deletion of an exam. Consult with the package ADPAC to determine how many Radiology/Nuclear Medicine package related mail groups should exist and what mail group(s) should be associated with each bulletin and who the mail group members should be. If this is not a virgin installation, you may not need to make any changes. For more information on bulletins and mail groups, see page 19 of this manual.
7. Use the Distribution Queue Purge [RA RPTDISTPURGE] option to purge distribution files of printed reports in the Report Distribution Queue file #74.3. This will help to minimize the CPU time needed to run the clean-up programs. The entries in this file are only pointers to the real report records. Sites not using distribution queues may have zero entries in this file. If there are zero entries in File #74.3, skip to step 9.
8. After the purge completes, determine the number of entries in the Report Distribution file #74.4. Using the VA FileMan Inquire option, enter "74.4" at the Output From What File prompt. VA FileMan should display the number of entries in the file. Use an "^" to exit the option. If you have a large number of entries (e.g., >10,000), you may want to use the Rebuild Distribution Queues [RA RPTDISTREBUILD] option and enter a date within the last 45 days. The purpose of this is to reduce the volume of data that must be processed by the clean-up programs.
9. Use the global placement utilities to create and place the new ^RADPTN global.
10. For multiple cpu's the following globals must be translated:

^RA
^RABTCH
^RADPT
^RADPTN (new global)
^RAMIS
^RAO
^RARPT

Installation Instructions

This guide can be used to install the package into either a test or production account. The following table indicates which steps are appropriate for the installation. You will probably wish to install the package in your test account first.

<u>Step</u>	<u>Description</u>	<u>Test</u>	<u>Prod</u>
1.	Make sure the Radiology/Nuclear Medicine (or Imaging Service) and voice recognition system users are off the system. Clinicians should stop ordering Rad/Nuc Med procedures during the install.		P
2.	Backup the system.		P
3.	Disable Mapping for RA* routines, if applicable.		P
4.	Disable journalling, if applicable (RA* globals).		P
5.	Stop all tasked jobs in the RA* namespace. Taskman should be up and running during this install.		P
6.	Manually disable the RA SIGN-ON MSG option. This must be done prior to the install to prevent errors during sign-on for other users.		P
7.	Delete old package routines from all your systems (optional). You may wish to delete existing RA namespaced routines. Also, remember not to delete any locally created routines (e.g., RAZ*). Use the routine deletion method you are most comfortable with.	T	P

Example:

```
D ^%RDELETE
```

```
ROUTINE DELETE
```

```
routine (s) ? > RA*
routine (s) ? > -RAZ* (On Open M, 'RAZ*')
routine (s) ? > <RET>
```

```
nnn routines to DELETE, OK: NO// YES (On Open M,
you get a Device: prompt)
```

- | | | | |
|-----|---|---|---|
| 8. | <p>Sign into the account where the package is installed. Make certain your DUZ variable is set to a valid user number and DUZ(0) equals "@". The environment check routine requires this. Invoke the KIDS menu (XPD Installation Menu option).</p> <p>There are two (2) builds that must be loaded. Only one build needs to be installed - it queues the cleanup.</p> <p>First, use the Load a Distribution option to load:
 RAD5_0CLN.KID
 The environment check routine requires this.</p> <p>Then use the same option to load: RAD5_0.KID</p> <p>Use the Install Package(s) option to install:
 RADIOLOGY/NUCLEAR MEDICINE 5.0</p> <p>This installation assumes TaskMan is running.</p> <p>Note: The installation example dialogue that follows may vary depending on the system you have (Alpha or Open-M) and the additional work that must be done in the pre- and post- installation process.</p> <p>See example of an installation over version 4.5, page 8.</p> | T | P |
| 9. | <p>If you have not encountered any problems during the installation, users can be allowed back on the system when it is complete. (Check the KIDS Install File Print in the Utilities menu to verify successful completion of this Radiology/Nuclear Medicine V. 5.0 install.)</p> | | P |
| 10. | <p>If your site is running the HL7 messaging interface to the VISTA Imaging package, you need to update copies of Radiology/Nuclear Medicine V. 4.5 routines that may exist on the DICOM server and/or Imaging workstations. These routines must also be updated each time they are affected by future patches.</p> | | P |
| 11. | <p>The KIDS cleanup install, RADIOLOGY/NUCLEAR MEDICINE CLEANUP 5.0, will run in the background. It should take less than 36 hours unless your site has</p> | T | P |

very large numbers of records in Files #74.4, #70, and #74. Use the KIDS Install File Print option under the Utilities Menu to check on the progress and completion of the cleanup install. If there are errors, you should fix the data problems, then restart the cleanup install through the KIDS Restart Install of Package(s) option.

Post Installation:

<u>Step</u>	<u>Description</u>	<u>Test</u>	<u>Prod</u>
1.	Enable journalling, if applicable. The following globals are recommended for journalling: ^RA ^RABTCH ^RADPT ^RADPTN (new global) ^RAMIS ^RAO ^RARPT		P
2.	If you did not purge all RA* routines prior to the install, you will need to delete RACTTK* and RACTEX* routines.	T	P
3.	Move the Radiology/Nuclear Medicine routines (RA* minus RAI*) onto all your systems, if applicable.		P
4.	Enable routine mapping, if applicable. The following routines are recommended for mapping: RABTCH* RACNLU RACT* RADEM* RADPA RAEDCN* RAEDPT RAFLH* RAHL* RAJAC RAORD* RAPROD* RAPROQ RAPSET* RAPTLU RAREG* RART* RASERV RASTED RASTEXT* RASTREQ* RAUTL*		P
5.	If this is a virgin installation of this package: <ul style="list-style-type: none">• Define at least one division for your site (File #79),• Assign the RA OVERALL menu to the ADPAC,• Assign the three RA security keys (RA ALLOC, RA MGR, and RA VERIFY) to the ADPAC,• Specify devices to print flash cards, jacket labels and	T	P

reports (see Implementation and Maintenance section of the technical manual for more information on how you can do this),

- Enter a mail group name for each one of the six bulletins (see page 19) exported, and
- Add the RA OVERALL menu to XUCORE menu.

- | | | | |
|----|---|---|---|
| 6. | If your Rad/Nuc Med service wants to print cancelled requests, you will need to enter the devices on which they should print. Use the Device Specifications for Imaging Locations [RA DEVICE] option under the IRM Menu [RA SITEMANAGER]. | T | P |
| 7. | If your facility is planning to use the Radiopharmaceutical dosage ticket feature, use the Device Specifications for Imaging Locations option to enter printers for each nuclear medicine imaging location where dosage tickets need to be printed. | | P |
| 8. | Print the install log using the KIDS Install File Print option and review it with your ADPAC. Some adjustments may be needed if the label or report printers data could not be resolved, or if any other messages indicate a problem. | | P |
| 9. | Further implementation can be done by the package ADPAC using the Implementation Check List in the ADPAC guide. | T | P |

The KIDS Distributions, ^XTMP("XQOO", "RADIOLOGY/NUCLEAR MEDICINE CLEANUP 5.0") and ^XTMP("XQOO","RADIOLOGY/NUCLEAR MEDICINE 5.0"), occupy approximately 2 megabytes of disk space and are deleted upon successful completion of the installation process.

Use the KIDS Build File Print option if you wish to obtain a complete listing of package components (e.g., routines and options) sent with this Distribution file.

Use the KIDS Install File Print option if you wish to print out the results of the installation process. You will need to retrieve the two install results separately.

A summary of installation times at the test sites can be found on page 23.

Please refer to the Health Level Seven package documentation and the Radiology/Nuclear Medicine Technical manual to set up and maintain

Radiology/Nuclear Medicine interfaces with non-*VISTA* systems (e.g., voice recognition systems and PACS systems).

Note: If you run an *XINDEX* or *%INDEX*, you may run into several errors caused by references to routines not in the UCI if the imaging package and/or OE/RR V. 3.0 (CPRS) are not yet installed or released. These errors are benign and do not affect the operation of the Radiology/Nuclear Medicine package. Routines involved are:

MAGRIC MAGSET3 ORMFN ORXP ORERR

There will also be a false warning for *RAUTL8*. This occurs because *XINDEX* and *%INDEX* can't recognize that a second line label is still part of an extrinsic function and is not called separately from the extrinsic function.

Installation Over Version 4.5 (Example)

The following example is taken from an installation on an Open M system. Quotes enclosing messages may not appear on your system and messages may change depending on the data at your facility.

D ^XUP

Select Kernel Installation & Distribution System Option: Installation

Note: You must load the cleanup file (RAD5_0CLN.KID) first. It will be queued to run from the Radiology/Nuclear Medicine 5.0 build.

Select Installation Option: Load a Distribution
Enter a Host File: RAD5_0CLN.KID

"KIDS Distribution saved on Sep 30, 1997@11:45:18"
Comment: Rad/Nuc Med Cleanup 5.0

This Distribution contains Transport Globals for the following Package(s):
RADIOLOGY/NUCLEAR MEDICINE CLEANUP 5.0

Want to Continue with Load? YES// <RET>
Loading Distribution...

Want to RUN the Environment Check Routine? YES// <RET>
RADIOLOGY/NUCLEAR MEDICINE CLEANUP 5.0
"Will first run the Environment Check Routine, RAIENV"

This build will be queued to run from the RADIOLOGY/NUCLEAR MEDICINE 5.0 build. RADIOLOGY/NUCLEAR MEDICINE CLEANUP 5.0 cannot be run independently.

Note: Although KIDS displays the next message automatically, you should ignore it. You will not select the Radiology/Nuclear Medicine Cleanup 5.0 build to install because it will install automatically after you install RAD5_0.KID.

Exception: Should the cleanup not run through to completion, then restart the cleanup using the following install name.

Use INSTALL NAME: RADIOLOGY/NUCLEAR MEDICINE CLEANUP 5.0 to install this Distribution.

Next, load the RAD5_0.KID file.

Select Installation Option: Load a Distribution
Enter a Host File: RAD5_0.KID

"KIDS Distribution saved on Sep 30, 1997@11:45:18"
Comment: Rad/Nuc Med 5.0

This Distribution contains Transport Globals for the following Package(s):
RADIOLOGY/NUCLEAR MEDICINE 5.0

Want to Continue with Load? YES// <RET>
Loading Distribution...

Want to RUN the Environment Check Routine? YES// <RET>
RADIOLOGY/NUCLEAR MEDICINE 5.0

"Will first run the Environment Check Routine, RAIENVCK"

Use INSTALL NAME: RADIOLOGY/NUCLEAR MEDICINE 5.0 to install this Distribution.

- 1 Load a Distribution
- 2 Verify Checksums in Transport Global
- 3 Print Transport Global
- 4 Compare Transport Global to Current System
- 5 Backup a Transport Global
- 6 Install Package(s)
Restart Install of Package(s)
Unload a Distribution

Note:

You may want to run the option Print Transport Global. Among other things, it provides a list of options and routines that will be deleted during the installation.

At this point, you should run the Verify Checksums in Transport Global option. If any of the routine checksums fail, you should contact your IRM Field Office and not proceed with the installation process.

Select Installation Option: Install Package(s)
Select INSTALL NAME: RADIOLOGY/NUCLEAR MEDICINE 5.0 Loaded from Distribution
11/5/97@16:50:55

"This Distribution was loaded on Nov 05, 1997@16:50:55 with header of"
"Rad/Nuc Med 5.0;Created on Sep 30, 1997@11:45:18"
It consisted of the following Install(s):
RADIOLOGY/NUCLEAR MEDICINE 5.0

RADIOLOGY/NUCLEAR MEDICINE 5.0
"Will first run the Environment Check Routine, RAIENVCK"

Note: You already have the 'IMAGING LOCATIONS' File.

79.2 IMAGING TYPE (including data)
Note: You already have the 'IMAGING TYPE' File.
I will MERGE your data with mine.

101 PROTOCOL (including data)
Note: You already have the 'PROTOCOL' File.
Data will NOT be added.

200 NEW PERSON (Partial Definition)
Note: You already have the 'NEW PERSON' File.

Answer YES to the following prompt and disable options beginning with RA. It disables all the options and protocols contained in **this KIDS build.**

Want to DISABLE Scheduled Options, Menu Options, and Protocols? YES//<ret>

Enter options you wish to mark as 'Out Of Order': RA*

Since some VA FileMan options are attached to a Rad/Nuc Med Supervisor menu, you **must deselect them at the next prompt or else they will be locked for the duration of this install and no one at your site will be able to use them.**

Enter options you wish to mark as 'Out Of Order': -DI*

Enter options you wish to mark as 'Out Of Order': <ret>

Enter RA* at the next prompt to disable site created quick order protocols not included in this KIDS build.

Enter protocols you wish to mark as 'Out Of Order': RA*

Enter protocols you wish to mark as 'Out Of Order': <ret>

Delay Install (Minutes): (0-60): 0// <ret>

Enter the Device you want to print the Install messages.
You can queue the install by enter a 'Q' at the device prompt.
Enter a '^' to abort the install.

DEVICE: HOME// (Spoolfile)

Note: TaskMan must be running to successfully complete this installation because the installation queues a data cleanup conversion.

Mail Groups and Bulletins

This chapter discusses creating mail groups and associating those mail groups to the package's six bulletins. These bulletins are generated when important actions take place (e.g., the deletion of an exam) and are sent to members of a mail group who should be aware that the action took place. The names of the bulletins are:

RAD/NUC MED REQUEST CANCELLED
RAD/NUC MED EXAM DELETED
RAD/NUC MED REPORT DELETION
RAD/NUC MED REPORT UNVERIFIED
RAD/NUC MED CREDIT FAILURE
RAD/NUC MED REQUEST HELD

To find out what mail groups are associated with these bulletins and who belongs to those mail groups, you can do a VA FileMan sort and print. The following is an example of a sort and print that can be run before or after the installation of this new version.

D Q^DI

VA FileMan 21.0

Select OPTION: **2** PRINT FILE ENTRIES

OUTPUT FROM WHAT FILE: BULLETIN// <RET>

SORT BY: NAME// <RET>

START WITH NAME: FIRST// **RA**<RET>

GO TO NAME: LAST// **RADZ**<RET>

WITHIN NAME, SORT BY: <RET>

FIRST PRINT FIELD: **.01**<RET> NAME

THEN PRINT FIELD: **4**<RET> MAIL GROUP (multiple)

THEN PRINT MAIL GROUP SUB-FIELD: **.01**<RET> MAIL GROUP

THEN PRINT MAIL GROUP SUB FIELD: **MAIL GROUP:MEMBER**<RET>

THEN PRINT MAIL GROUP SUB FIELD: <RET>

THEN PRINT FIELD: <RET>

Heading (S/C): BULLETIN LIST// <RET>

START AT PAGE: 1// <RET>

DEVICE: (printer name) <RET> RIGHT MARGIN: 80// <RET>

Consult with the package ADPAC to determine how many mail groups to create, what mail group(s) you wish to associate with each bulletin, and who should be the coordinator for each mail group.

The following are suggestions for setting up six mail groups, one for each bulletin.

1) Bulletin Name: RAD/NUC MED REQUEST CANCELLED

<u>Mail Group (#3.8) field name</u>	<u>Suggested value</u>
NAME	RA REQUEST CANCELLED
TYPE	Public
RESTRICTIONS	Unrestricted
DESCRIPTION	The members of this mail group will receive a bulletin when a Radiology/Nuclear Medicine request is cancelled.

2) Bulletin Name: RAD/NUC MED EXAM DELETED

<u>Mail Group (#3.8) field name</u>	<u>Suggested value</u>
NAME	RA EXAM DELETED
TYPE	Public
RESTRICTIONS	Unrestricted
DESCRIPTION	The members of this mail group will receive a bulletin when a Radiology/Nuclear Medicine exam is deleted

3) Bulletin Name: RAD/NUC MED REPORT DELETION

<u>Mail Group (#3.8) field name</u>	<u>Suggested value</u>
NAME	RA REPORT DELETION
TYPE	Public
RESTRICTIONS	Unrestricted
DESCRIPTION	The members of this mail group will receive a bulletin when a Radiology/Nuclear Medicine report is deleted.

4) Bulletin Name: RAD/NUC MED REPORT UNVERIFIED

<u>Mail Group (#3.8) field name</u>	<u>Suggested value</u>
NAME	RA REPORT UNVERIFIED
TYPE	Public
RESTRICTIONS	Unrestricted
DESCRIPTION	The members of this mail group will receive a bulletin when a Radiology/Nuclear Medicine report is changed from Verified to any other status.

5) Bulletin Name: RAD/NUC MED REQUEST HELD

<u>Mail Group (#3.8) field name</u>	<u>Suggested value</u>
NAME	RA REQUEST HELD
TYPE	Public
RESTRICTIONS	Unrestricted
DESCRIPTION	The members of this mail group will receive a bulletin when a Radiology/Nuclear Medicine request is placed on a status of Hold.

6) Bulletin Name: RAD/NUC MED CREDIT FAILURE

<u>Mail Group (#3.8) field name</u>	<u>Suggested value</u>
NAME	RA CREDIT FAILURE
TYPE	Public
RESTRICTIONS	Unrestricted
DESCRIPTION	The members of this mail group will receive a bulletin when an exam has not been credited properly.

The following is an example of creating a mail group.

D Q^DI

VA FileMan 21.0

Select OPTION: 1 ENTER OR EDIT FILE ENTRIES

INPUT TO WHAT FILE: MAIL GROUP// <RET>

EDIT WHICH FIELD: ALL// <RET>

Select MAIL GROUP NAME: RA CREDIT FAILURE

Are you adding 'RA CREDIT FAILURE' as

a new MAIL GROUP (the nnTH)? YES

MAIL GROUP COORDINATOR: TAYLOR,FRANK FT

Select MEMBER: SMITH,NANCY NS

Are you adding 'SMITH,NANCY' as a new MEMBER (the 1ST for this MAIL GROUP)?

YES

Select MEMBER: <RET>

DESCRIPTION:

1>The members of this mail group will receive a bulletin when an

2>exam has not been credited properly.

3><RET>

EDIT Option: <RET>

TYPE: public

ORGANIZER: JONES,GARY

COORDINATOR: PACK,ADAM

SELECT AUTHORIZED SENDER: <RET>

ALLOW SELF ENROLLMENT?: NO

REFERENCE COUNT: <RET>

LAST REFERENCED: <RET>

RESTRICTIONS: 0<RET>UNRESTRICTED

Select MEMBER GROUP NAME: <RET>

Select REMOTE MEMBERS: <RET>

Select DISTRIBUTION LIST: <RET>

Select MAIL GROUP NAME: <RET>

The following is an example of associating a mail group with a bulletin.

D Q^DI

VA FileMan 21.0

Select OPTION: 1 ENTER OR EDIT FILE ENTRIES

INPUT TO WHAT FILE: BULLETIN// <RET>

EDIT WHICH FIELD: ALL// 4<RET> (multiple)

EDIT WHICH MAIL GROUP SUB-FIELD: ALL// <RET>

THEN EDIT FIELD: <RET>

Select BULLETIN NAME: RAD/NUC MED CREDIT FAILURE

Select MAIL GROUP: RA CREDIT FAILURE

Are you adding 'RA CREDIT FAILURE' as

a new MAIL GROUP (the 1st for this BULLETIN)? YES

Select MAIL GROUP: <RET>

Select BULLETIN NAME: <RET>
